

FIG. 1

A graph showing the relationship between Growth/Cycle (Y-axis) and Temperature (X-axis). The Y-axis is labeled 'GROWTH/CYCLE' and has a horizontal dashed line at the level of '1 MONO LAYER'. The X-axis is labeled 'TEMPERATURE' and has two vertical dashed lines. The curve starts at a high value on the left, decreases linearly to the first vertical dashed line, remains constant at the '1 MONO LAYER' level until the second vertical dashed line, and then decreases linearly again.
